DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- A. Group I, claim(s) 131-144 are drawn to a water-soluble polymer linked to a solid support being selectively cleavable therefrom comprising a cleavage section (first known composition and segment) closest to the support, a second known composition and sequence separated from the support by a cleavage section, and monomer units linked to a tag directly or via a reactive functionality. (A 1st product or a 1st special technical feature).
- B. Group II, claim(s) 145-157 are drawn to a tagged water-soluble polymer linked to a solid support being selectively cleavable therefrom *which does not require* the first cleavage segment to be closest to the support or the second known composition and sequence to be separated from the support by a cleavage section; and a process for utilizing said polymer. (A 2nd product/special technical feature and a method that utilizes the 2nd special technical feature).

Art Unit: 1641

- C. Group III, claim(s) 158 is drawn to a process of producing a conjugate of an analyte-binding species and a tagged water-soluble polymer. (A 1st process of making a special technical feature).
- D. Group IV, claim(s) 159-162 are drawn to a process of preparing a tagged water-soluble polymer. (A 2nd process of making a special technical feature).
2. The inventions listed as Groups A, B, C and D do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Under PCT rules Applicant is entitled to an examination of one of the combination groupings: (1) a product, a method of using said product and a method of producing said product. The instant claims are directed to two independent products (Group A and B) as well as two independent processes (Group C and D), therein applicant must select one for further prosecution.
3. In the instant case, Group A is a water-soluble polymer (product) with diverse and distinct configurations from the tagged water-soluble polymer of Group B. Accordingly, a single special technical feature is not recited. Group C is drawn to a process of producing a conjugate of an analyte-binding species and a tagged water-soluble polymer while Group D is drawn to a process of preparing a tagged water-soluble polymer. Since the inventions are materially different, diverse, and distinct (lack the same or corresponding special technical feature) one invention must be selected for consideration, either the product of Group A, the product/method of Group B, the process of Group C, or the process of Group D.

Art Unit: 1641

4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group A, B, C and D are not totally inclusive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
